OnGuard ACEPro PLUS Skills Training and Tracking Program

The OnGuard ACEPro PLUS Skills Training Program is a Learning Management System (LMS) which delivers a series of self directed, online, eLearning training modules for **workshop equipment** using multimedia technology. The LMS provides a **documented training** program that **instructs and tests** on the **Safe Operating Procedures (SOP)** required for machines and equipment that are typically used in **light manufacturing and engineering workshops**.

OnGuard ACEPro PLUS is the major **workshop skills and training program** currently being used in the **Australian Education** sector: trade & high schools, TAFE colleges & universities.

Online **eLearning** multimedia resources presenting **Safe Operation Procedures** for over 120 items of equipment found in a range of **light manufacturing workshops** - ranging from wood & engineering **machinery**, wood & metal **power tools**, through to cooking / **hospitality equipment** and sewing tools.

Includes **Safe Operation Procedures** and **knowledge tests** in print form for most items of **machinery and equipment** used within **light manufacturing workshops**. Ideal for training **one-on-one delivery** without the need to use computers. Black on white or full colour these print training resources are **first class**.

Includes **safe operation tutorials** designed to assist with the **testing of knowledge** acquired from the **skill training**. Ideal for use at training facilities when the trainer is absent. It is best used in conjunction with the Safe Operation Procedure. It is the **perfect supplement** to one-on-one training – **ideal for revision**.

Certificates of attainment are generated for a **100% score** on the **SOP knowledge test** for every item of machinery.

Trainers can generate certificates and **record certification**.

Ideal for personal records and training logs.

Items of equipment and activities available in the following eLearning Modules:

Metal Technologies (22 units), Wood Technologies (33 units), Workshop Technologies (16 units), Workplace Safety (10 units), Food (12 units), Agriculture (4 units), Textiles Technologies (9 units), Electronics (2 units), Plastics (4 units), Construction (4 units), Safety In the Construction Industry (16 units), Automotive Workshops (4 units), Science (15 units), Physical Education / Sport (8 units), Welcome to High School (4 units) and Drama Studies (4 units)

Supervisors & Trainers Resources

Printable **single page PDF** documents that contain summarised **Safe Operation Procedures**. They contain **risk of injury** information and indicate suitable Personal Protective Equipment requirements.

Ideal as a machine placement Poster – SOP Summary.

Workshop supervisors have access to printable multi-page MS Word documents that contain **risk assessments** related to the machinery and equipment items listed. The **National Safety Council Risk Score Calculator** is used to document risk assessments.

OnGuard ACEPro PLUS – online LMS
OnGuard ACEPro PLUS Skills Training & Tracking Program allows the training of users to be tracked and recorded into a sophisticated Learning Management System (LMS). Most useful in the event of a workplace audit or incident, as you can produce records at the click of a button. This is an efficient way to manage trainee's skill and safety training over several years.

On-Site Training & Technical Support
We offer a comprehensive support service to clients. On-site training for staff and supervisors can be provided on request. Telephone and email technical support is available - FREE.

We can assist you to develop training resources that **target the training needs** of your specialist workshop staff. We understand the specific safety and **skills training** demands required when delivering **technical and workshop** based courses.
